

# SlipStream SP - The Fastest Web & Email Acceleration

SlipStream SP provides unsurpassed web and email acceleration, with speed increases up to 6X faster than traditional dial-up. SlipStream SP combines patented proprietary data compression technology with optimization components that further increase performance the more you use it. This powerful technology gives ISPs an alternative product offering for dial-up or wireless users who either don't have access to high-speed cable or DSL services, or don't want to pay the higher prices charged for broadband. Independent test results continuously confirm that SlipStream SP is the fastest web accelerator on the market.

## Benchmark Test Results

SlipStream's Web Accelerator product beat out the competition in Internet BenchMark testing conducted by VeriTest.

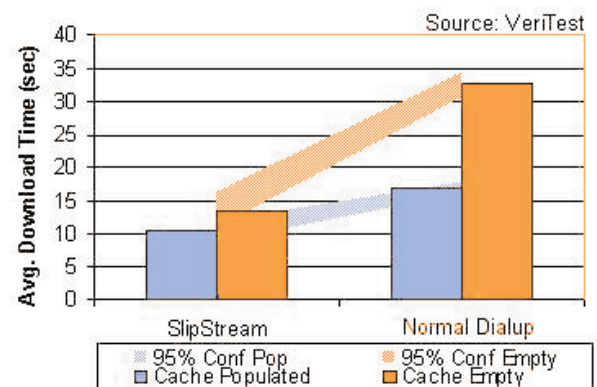

### Report findings:

- ✓ SlipStream's accessed first web pages more than 33 percent faster than the competition
- ✓ SlipStream improved download times by up to 5X
- ✓ SlipStream improved web page download times by an average of more than 2X
- ✓ SlipStream compressed text components of web pages by an average of 5.9X
- ✓ SlipStream compressed email messages and attachments more than 4.5X (for Microsoft Outlook and Microsoft Outlook Express)
- ✓ SlipStream blocked most pop-ups
- ✓ At under 6MB, SlipStream required significantly less hard disk space than competitive solutions

## In The News...

### "Hitting the Accelerator on Your Dial-Up Service"

The Wall Street Journal recently published a report by respected technology journalist Walter Mossberg, which confirms that NetZero HiSpeed, a custom branded application of SlipStream's Web Acceleration technology, leads the market in performance.
